

OUR SERVICES

Pest2Guard offers an extensive portfolio of services designed to address every aspect of pest and environmental management. Our integrated approach ensures that we can provide a complete solution for any property.

Specialised Pest Control

Our core expertise lies in tackling the most destructive and challenging pests.

Subterranean Termite Control

We protect your property from the ground up with advanced solutions to eliminate subterranean termite colonies. This includes thorough inspections, soil treatments to create protective barriers, and sophisticated baiting systems that eradicate the entire colony, including the queen.

Cockroach & Ant Control

We provide fast and thorough elimination of cockroaches and ants, essential for maintaining hygiene in homes and meeting health code standards in businesses. Our targeted treatments eliminate colonies at their source and break the reproductive cycle for long-lasting protection.

Roof & Field Rodent Control

Our comprehensive rodent management programme involves inspection, exclusion (sealing entry points), strategic trapping, and tamper-resistant baiting to eliminate rat and mouse infestations and prevent their return.

Harvester Termite Control

We safeguard lawns, gardens, sports turf, and agricultural crops from the devastating impact of harvester termites. Our targeted baiting programmes effectively control foraging termites and protect your valuable green assets.

The Future of Pest2Guard

As we look to the future, Pest2Guard is committed to remaining at the cutting edge of the pest control industry. We will continue to invest in innovation, exploring new, more effective, and even safer technologies and treatment methods. Our goal is to expand our reach while deepening our expertise, allowing us to serve more communities across South Africa. Sustainability will remain a key driver,

TRUSTED PEST SOLUTIONS

Pest2Guard is a leading provider of professional pest control and environmental solutions across South Africa. With operational hubs in Johannesburg, Pretoria, we are dedicated to protecting homes, businesses, and agricultural properties from the significant threats posed by pests. Our foundation is built on delivering reliable, effective, and responsible services that ensure the health and safety of our clients and their environments. We tackle every challenge, from common household nuisances to large-scale industrial infestations, with unparalleled expertise and a commitment to lasting results.

Our Story

Pest2Guard was born from a clear and simple vision: to offer a pest control service that clients could truly rely on—one that was not only effective but also safe for families, pets, and the delicate South African ecosystem. Our founders, veterans of the industry, observed a gap in the market for a provider that combined technical expertise with a genuine commitment to customer care and environmental stewardship. They envisioned a company that would move beyond temporary fixes and instead deliver holistic, long-term solutions.

Starting with a small, dedicated team, Pest2Guard focused on building a reputation for excellence one client at a time. The early days were defined by a hands-on approach, with our founders personally overseeing jobs to ensure the highest standards were met. This dedication to quality quickly set us apart. Word-of-mouth referrals from satisfied homeowners and businesses became our most powerful marketing tool, fuelling steady growth and expansion.

Our Mission

To deliver superior pest control and environmental management solutions that protect health, property, and the environment. We strive to provide peace of mind to our clients through reliable, effective, and safe services delivered with the highest level of professionalism and integrity.

Our Vision

To be South Africa's most trusted and respected provider of integrated pest and environmental solutions, renowned for our commitment to innovation, sustainability, and unparalleled customer satisfaction. We aim to set the industry standard for excellence and responsible service delivery.
